

## SIZING GUIDE - BRACELETS

### HOW TO MEASURE YOUR WRIST SIZE

#### STEP 1

Print this document on a sheet of A4 paper at actual size. To make sure your document has been printed at actual size, please check that the scale below measures exactly 5 cm:

#### STEP 2

Cut out the band along the line.

#### STEP 3

Start by placing the rounded edge of the band on your wrist. The graduated side must be visible.

Wrap the band around your wrist, where you usually wear your jewelry or watch.

The number displayed at the arrow tells you the size of your wrist in centimeters.

To find your exact wrist measurement, we recommend that you place the band close to your wrist. It shouldn't be too tight, nor should there be a gap between the band and your skin.

Still not sure about your bracelet size? Please contact us to get personal advice from one of our advisors.
